

دانشگاه علوم پزشکی و خدمات بهداشتی و درمانی شهید بهشتی
مدیریت منابع علمی، کتابخانه مرکزی و اسناد

تهیه کننده: فاطمه عزى
(کتابخانه دانشکده طب سنتی)

- Ovid یکی از اولین پایگاه‌های تجاری دنیا در امر گسترش سریع تکنولوژی اطلاعات (IT) است. در سال ۲۰۰۱ با شرکت Silver Platter ادغام شد و موجب یکی شدن منابع، دو نام برجسته دنیا در زمینه پزشکی و تحقیقاتی علمی شد. این پایگاه یک پیشرو شناخته شده در حل نیازهای اطلاعاتی الکترونیکی در زمینه‌های علوم زیستی، بهداشت و پزشکی است.
- Ovid با استفاده از موتور جستجوی قوی خود، جستجو، تحقیق و دسترسی به محتوای ۱۳۰۰ ژورنال و بیش از ۴۵۰۰ کتاب را از حدود ۱۰۰ بانک اطلاعاتی امکان‌پذیر ساخته است.
- تنها در آمریکای شمالی، Ovid توسط ۹۳٪ از کتابخانه‌های پزشکی، ۹۷٪ از بیمارستان‌های آموزشی و ۸۷٪ از بیمارستان‌های آمریکا و همچنین توسط ۳۰ شرکت برجسته داروسازی مورد استفاده قرار می‌گیرد.

Ovid

Basic Search

(جستجوی ساده)

Basic Search

این قسمت فقط جستجو در عنوان و چکیده را دارا می باشد.

The screenshot shows the Ovid Basic Search interface. The 'Search' button in the top navigation bar is highlighted. The 'Basic Search' tab is selected. A search box contains the text 'EBM Reviews - Cochrane Central Register of Co'. Below the search box, the 'Limits' section is expanded, showing various filters. A green callout box points to the 'Limits' section with the text 'جهت مشاهده محدودکننده‌ها'. Another green callout box points to the search box with the text 'جستجو در میان تصاویر، فیلم‌ها'. A third green callout box points to the 'Include Multimedia' and 'Include Related Terms' checkboxes with the text 'علاوه بر کلیدواژه مورد نظر، واژه‌های مرتبط را نیز جستجو می‌کند'. The 'Search History' section is also visible, showing a table with columns 'Results', 'Search Type', and 'Actions'.

View Abstract

View Abstract

AB OBJECTIVE: To determine whether traditional bone-setting or continuous light exercise therapy could ease back pain and improve function better than ordinary physiotherapy. DESIGN: Observer-blinded, randomized clinical trial with a 6-month follow-up. SETTING: An outpatient institution for folk medicine research. PATIENTS: Of 147 back pain patients recruited from local health centers and by newspaper announcements, 132 were found eligible (non-retired-no contraindications to manipulation) and entered. A final 114 (one dropout) with back pain for longer than 7 weeks were included in this intent to treat analysis. INTERVENTIONS: Bone-setting, guidance for continuous light back movements or physiotherapy for up to ten 1-hour sessions during 6 weeks. MAIN OUTCOME MEASURES: Spinal mobility and muscular performance. Back pain assessed by visual analog scales (VAS). RESULTS: The physical measures changed only modestly, from one tenth to half of standard deviation, while the VAS was halved. The thoracolumbar side-bending, the modified Schober, and the VAS were significantly better improved by bone-setting than by exercise but not better than by physiotherapy. CONCLUSION: Neither bone-setting nor exercise differed significantly from physiotherapy, but bone-setting improved lateral and forward bending of the spine and back pain more than did exercise.

Advanced Search

(جستجوی پیشرفته)

جستجوی پیشرفته

The screenshot shows the Ovid Advanced Search page. The interface includes a search bar at the top with a 'Search' button. Below the search bar, there are tabs for 'Search', 'Find Citation', 'Search Tools', 'Search Fields', 'Advanced Search', and 'Multi-Field'. The 'Advanced Search' tab is selected. The search fields section has radio buttons for 'Keyword', 'Author', 'Title', 'Journal', and 'Book Name'. The 'Keyword' field is active. Below the search fields, there is a 'Limits' section with various filters. The filters are organized into columns: 'Abstracts', 'Articles with References', 'Diagnosis', 'English Language', 'Full Systematic Reviews', 'Medline Records', 'Prognosis', 'Therapeutics', 'Articles with Abstracts', 'Core Clinical J', 'EBM Trends', 'Etiology', 'Full Text', 'New Reviews', 'Protocols', 'Humans', 'Articles with Graphics', 'Date', 'Records', 'Based Medicine Reviews', 'Update', 'Ovid Full Text Available', 'Recently Updated Reviews', and 'Review Articles'. There are also dropdown menus for 'Publication Year', 'Age Groups', 'Book Subsets', 'Journal Subsets', and 'Languages'. The 'Age Groups' dropdown is open, showing options like 'All Infant (birth to 23 months)', 'All Child (0 to 18 years)', 'All Adult (19 plus years)', 'Newborn Infant (birth to 1 month)', and 'Infant (1 to 23 months)'. The 'Book Subsets' dropdown is also open, showing options like 'Alternative & Complementary Medicine', 'Arts & Humanities', 'Behavioral & Social Sciences', 'Clinical Medicine', and 'Health Professions'. The 'Journal Subsets' dropdown is open, showing 'Alternative & Complementary Medicine'. The 'Languages' dropdown is open, showing 'Afrikaans'.

[Table of Contents](#)

Journal Description
A Case Reports is a clinical companion journal to the International Anesthesia Research Society's flagship publication, *Anesthesia & Analgesia*. A Case Reports is designed to be the specialty's indispensable resource for peer-reviewed case reports that make an important teaching point or scientific observation in disciplines related to anesthesiology: perioperative medicine, critical care, and pain management.

Review article 475

Silymarin and hepatocellular carcinoma: a systematic, comprehensive, and critical review

Jeanetta K. Mastron^a, Kodappully S. Siveen^{c,d}, Gautam Sethi^c and Anupam Bishayee^b

The blessed milk thistle (*Silybum marianum* L.), a flowering plant native to Mediterranean Europe, has been consumed and extensively used as a cure for various chronic liver ailments over several centuries. Milk thistle extract, known as silymarin, is a complex mixture of seven major flavonolignans and one flavonoid. The phytoconstituents of silymarin owe their therapeutic and hepatoprotective effects to their strong antioxidant and anti-inflammatory properties. Primary liver cancer, also known as hepatocellular carcinoma (HCC), occurs in a milieu of oxidative stress and inflammation. The etiology of HCC includes chronic infection with hepatitis B and C viruses, cirrhosis, and

mechanisms involved in the anti-liver-cancer effects of silymarin have been presented. The current status of clinical studies evaluating the potential of role of silymarin in liver cancer, especially that caused by hepatitis C virus, has also been examined. Potential challenges and future directions of research involved in the 'bench-to bedside' transition of silymarin phytoconstituents for the chemoprevention and treatment of HCC have also been discussed. *Anti-Cancer Drugs* 26:475-486 Copyright © 2015 Wolters Kluwer Health, Inc. تنظیمات My Project

The screenshot shows the Ovid My Project interface. The top navigation bar includes 'Search', 'Journals', 'Books', 'Multi', 'My Workspace', and 'Primal Pictures'. The 'My Workspace' tab is active, showing a 'My Projects' section with a dropdown menu for 'All Projects' and a 'Search' button. Below this is a table of projects, including 'folk med.' with 1 item, modified on 2015-Apr-21. To the right of the table are options to 'Edit' or 'Delete' the project. Below the table is a section for 'Archived Projects' and a 'Trash' section. The 'Trash' section is currently empty, with a message stating that messages in the trash more than 30 days will be automatically deleted. On the right side of the interface, there are links for 'Print', 'Email', 'Export', and 'Remove'. At the bottom right, there is a sidebar with links for 'Abstract Reference', 'Complete Reference', 'Find Citing Articles', 'Document Delivery', and 'EBM Full Text'.

Getting Started

Welcome to *Interactive Hand - 2013 Edition*

For a comprehensive guide to all the tabs, tools, and icons in the top right corner.

QUICK START GUIDE TO USING *Interactive Hand*

3D VIEWS

The 3D Views tab in the lower right of the screen displays a list to quickly navigate around the product.

ANATOMY

Explore the 3D anatomy using the Layer and Rotate controls. Add/remove layers of anatomy using the drop-down menu. Rotate the 3D model using the left/right arrows - double click for single arrows rotate by 1 frame. Click on any structure in the image to highlight it and read its description. You can Save or Print images and text at any time.

CONTENTS

Click on the Contents icon at the top left of the screen to contain text articles for all structures as well as slides.

INDEX

Click on the Index icon at the top left of the screen to list views alphabetically.

The screenshot displays the 'Interactive Functional Anatomy' software interface. The main window shows a full-body 3D skeleton model. On the left, a smaller window displays a detailed view of a hand and forearm. On the right, a 'Getting Started' panel provides instructions and a '3D anatomy view list' with options like 'Full body' and 'Arteries and Nerves'. A smaller inset window on the right shows a close-up of a skull and neck with a red muscle highlighted, titled 'Contralateral rotation of the head and cervical spine'.

Pectoralis major

A muscle of the anterior chest wall that acts on the shoulder joint. It forms the bulk of the anterior wall of the axilla and has 2 heads, *clavicular* and *sternocostal*.

Origin

Clavicular head
Clavicle: medial end.
Sternocostal head
Manubrium.
Sternum.
Costal cartilages 1 to 6.
Rectus sheath.

Insertion

Humeral deltoid tuberosity.

(با امکان تعیین تعداد سوالات، نحوه سوالات، سطح آزمون)

3D Human Anatomy Quiz

In this section you will be able to test your knowledge of anatomy. Here are some simple instructions and tips to get you going:

Number of questions
You can choose how many questions are to be featured in your quiz. The minimum number of questions is five.

Question type
There are two types of quiz questions: 'Where is' and 'What is'.

'Where is' questions will ask you to identify an anatomical structure in the 3D model. For example, if the question is 'Where is the femur?' you will need to find the femur in the 3D model and click on it.

'What is' questions will ask you to name the anatomical structure highlighted in the 3D model. You will be given a choice of five anatomical structures, of which only one is correct.

Question difficulty
You will also have the choice to take easy or hard questions. Easy questions will test you on the basic functional anatomy of the chosen area, such as major muscles, ligaments and neurovascular supply. Difficult questions will test you on less obvious anatomical structures, such as divisions of musculature and detailed neurovascular supply.

Choosing views
You can also choose which 3D view to be tested on. You have the option to set the quiz on all or a subset of views.

Review
During the quiz, you may want to consolidate your knowledge of a particular area of anatomy. This is facilitated by clicking on the Review button, which will open up the relevant product title in a new tab or window. Please note that once you have clicked on the Review button, subsequent clicks will refresh the currently opened tab or window, which may be displayed behind the Quiz window.

For in-depth information on Quiz functionality and features, please click on the help file. *Good luck!*
